

Ing. Adrián Selecký

Unity/C# game and software engineer with 10 years of commercial experience (2016–2026), including a live-service multiplayer title with 500k+ unique users. Core strengths: gameplay systems, UI/tools engineering, performance optimization, backend/cloud integration, multiplayer architecture. Comfortable working solo end-to-end or embedded in a small team. Interested in full-time, part-time, or contract-based roles in game development or general C#/software engineering.

Work experience

Oct 2019
Sep 2026

Unity Game Developer, INLOGIC SOFTWARE s.r.o. - Košice, Slovak Republic

- Gameplay programmer on Golf Open Cup, a live-service multiplayer golf title (team of two programmers) — 500k+ combined unique users on Android and iOS, rated 4.3/5 on Google Play, 4.6/5 on the App Store
- Built and maintained multiplayer systems using Photon PUN2, with PlayFab as backend and Azure MySQL for data storage
- Implemented remote content delivery and configuration via Unity Addressables, Unity CCD, and Unity Remote Config
- Wrote custom shaders and deterministic physics calculations to improve rendering and gameplay performance
- Owned gameplay programming, UI, and cloud-based systems across the title's live-service lifecycle

May 2018
Sep 2019

Unity Game Developer, INLOGIC SOFTWARE s.r.o. - Košice, Slovak Republic

- Sole programmer on single-player mobile games, handling end-to-end development for commercial release
- Worked alongside a game designer and a graphics designer across full project lifecycles, from prototyping to launch
- Delivered 3D projects including a Temple Run-style endless runner
- Supported other company projects, including full movement system and animator setup for a soccer game

July 2016
Apr 2018

Unity Game Developer (Part time), INLOGIC SOFTWARE s.r.o. - Košice, Slovak Republic

- Developed Android puzzle games (often adaptations of popular titles) for third-party publishers
- Optimized builds to run on very low-end hardware (e.g. Sony Ericsson Xperia X8), keeping builds under 30MB
- Owned gameplay programming, UI, sound implementation, and level editor tooling
